FAC Body Donation Program FAQ’s

What is the Forensic Anthropology Center at UTK?

The Forensic Anthropology Center (FAC) is a leading institution for research and training in forensic anthropology and closely related fields. Our facilities consist of the Anthropology Research Facility (commonly known as The Body Farm), the William M. Bass Forensic Anthropology Building, and the UTK Donated Skeletal Collection. Donors to the FAC are a great asset as their bodies and skeletal remains are utilized in our efforts to teach future scientists from UTK and other institutions; provide training for law enforcement officers and members of the military; conduct research in forensics and anthropology; and perform forensic casework.

What kind of research does the FAC conduct?

The FAC is engaged in a broad spectrum of research about human decomposition and skeletal biology.

What happens to a donor’s body once it is donated to the FAC?

Donors are typically involved in two phases of research with the FAC. Initially, donors are placed at the Anthropology Research Facility for studies related to the process of decomposition. After this process is complete, donor’s skeletons are collected, cleaned, and added to the UTK Donated Skeletal Collection for further studies related to skeletal biology.

Does the FAC return a donor’s remains to their family?

No, the donor’s skeleton is added to the UTK Donated Skeletal Collection for continued research and educational purposes. This valuable resource is currently the largest collection of modern people in the United States. We still study and conduct research on the very first donor we received in 1981.

Must an individual pre-register to be donated to the FAC?

Not necessarily, because the FAC does accept donations made by an individual’s next-of-kin. However, these donations are only accepted on a case-by-case basis. We do recommend pre-registration for any individual who has decided they would like to donate to our program.

Can an individual be an organ/tissue donor prior to donation to the FAC?

Yes, body donors to the FAC may also donate organs and/or tissues. The only tissue which we ask that you do not permit postmortem donation is skeletal tissue (i.e. bone or bone marrow).

Will the FAC accept a donor who has been autopsied?

Yes, the FAC accepts autopsied individuals.

Will the FAC accept a donor who has been embalmed?

No, the FAC does not accept donors who have been embalmed.

Will the FAC accept a donor who dies with an infection like sepsis?

The FAC cannot accept donations of individuals who have a communicable disease (e.g. HIV, TB, Hepatitis, etc.) or an active infection (e.g. sepsis, MRSA, COVID-19, etc.) at the time of their death. Registered individuals who are unable to be whole body donors may be donated in the form of non-pulverized cremated remains.

Will the FAC accept a donor who previously had hepatitis but has successfully completed treatment?

Yes, the FAC will accept the donation of an individual who has successfully treated their hepatitis infection. Please submit the results of your lab work (i.e. titer results) showing your hepatitis-negative state.
Does the FAC require any testing of the donor to be performed prior to accepting their body?

Maybe. Depending on current community infection rates for various diseases, like COVID-19, or based on the donor’s medical history we may require postmortem testing for such viruses or infectious diseases. Our website (fac.utk.edu/body-donation/) contains the most up-to-date information regarding testing requirements.

Does the FAC provide transportation for a donor?

The FAC provides transportation from hospitals, funeral homes, and medical examiner’s offices located within Tennessee and within 100 miles of Knoxville. We will also provide transport from the Knoxville airport for donors who are flown from outside our transportation radius. The FAC does not pick up donors from private residences, hospice facilities, nursing homes, or the like. Donors who are in these situations must arrange for transportation to a funeral home within our transportation radius for transportation to our facility or transportation directly to the FAC.

How should an individual make arrangements for transportation to the FAC?

We recommend that donors who live outside of our transportation radius work with a funeral home in their area to make transportation arrangements. Donors may be driven to our facility or flown into the Knoxville airport. The FAC will provide transportation from the Knoxville airport to our facility at no charge.

Is there a fee for donating an individual to the FAC?

The FAC does not charge a fee for donation to our program. However, there may be fees associated with temporary storage of an individual prior to transport, transportation from outside of our transportation radius, or for cremation. The donor and/or the donor’s family are responsible for these charges.

How does an individual donate their body to the FAC?

An individual should complete the donation paperwork and send to the FAC. After receipt and processing of your paperwork, we will send you an acceptance letter, a guide with steps for your family and/or friends to follow after your death, and a Donor Card which you may keep in your wallet to help make your wishes known. Inform your family and friends of your desire to donate to the FAC and provide them with a copy of the guide included with your acceptance letter. If necessary, contact a funeral home in your area to make pre-needs arrangements for transportation to the FAC.

Can an individual request not to be buried, exposed to water, etc.?

The FAC cannot guarantee that we will grant all requests, but we make every effort to accommodate all reasonable requests. If you wish to make such a request, please indicate this on your paperwork.

How should I notify the FAC of changes to my contact information or medical status?

Please email any updates to donateinfo@utk.edu or call us at 865-974-4408.

Can an individual cancel their registration with the FAC if they change their mind?

Yes, please send us a letter indicating your desire to cancel your registration. You may email the letter to donateinfo@utk.edu or mail it to us at: FAC Donation Paperwork 1621 Cumberland Avenue Strong Hall Room 505 Knoxville, TN 37996-1525

Where can I find more information about the body donation program and the FAC?

More information can be found on our website (fac.utk.edu/body-donation/), by emailing us at donateinfo@utk.edu, or calling us at 865-974-4408.
The donation of a person’s body after death is a tremendous gift. We are grateful for everyone who expresses an interest in body donation. We appreciate your attention to the following.

1. Unlike medical schools, we do not return remains to the family. The skeletal remains are a very important component to our research and teaching program. Once a donor’s skeletal remains have been added to the UTK Donated Skeletal Collection, they may be used for instruction in forensic and biological anthropology courses, training of professionals from around the world, and as part of a wide variety of research that is shared with the scientific and lay communities in Knoxville and across the globe. The first donation made to our program in 1981 continues to be studied by researchers today.

2. We reserve the right to decline donations of individuals who have any form of infectious disease such as HIV, tuberculosis, hepatitis, or coronavirus of any kind (COVID-19, SARS, etc.); prion-related diseases (Creutzfeldt-Jakob Disease, Kuru, etc.); infections such as sepsis; or any Multi-Drug Resistant Organisms (MDRO’s) including antibiotic resistant infections such as MRSA even if contracted after donation is arranged. We also reserve the right to decline a donation if our facility is at capacity. In case of denial by the University, alternate final arrangements should be discussed between the donor and their family/legal representative. The FAC is not responsible for any costs associated with alternate arrangements.

3. Registered donors who are declined for any reason who still wish to donate may do so by choosing to have their remains cremated. We have a growing collection of cremains that provides an invaluable learning resource. People choosing this option should contact us prior to making arrangements. This allows us to work with the crematory involved to ensure the cremains are not pulverized. The donor’s family or their estate must assume responsibility for the arrangement and cost of cremation.

4. If you are an organ and/or tissue donor, you may still donate your body to our program. However, we do ask that you do not permit postmortem skeletal tissue (i.e. bone or bone marrow) donation.

5. We will arrange transportation to our facility if the deceased is located in a hospital, funeral home, or medical examiner’s office within 100 miles of Knoxville and within the state of Tennessee. Outside the state of Tennessee or more than 100 miles from Knoxville, the donor and/or the donor’s family must arrange for the transportation of the body to our facility and assume all responsibility for any associated costs.

6. We are unable to transport from a private residence, hospice facility, nursing home, or the like. If the deceased is in one of these locations, the donor’s family or their representative must arrange for transportation to a funeral home and assume responsibility for the cost.

7. We must have signed donation documents prior to transporting.

8. Donor paperwork should be returned to the Forensic Anthropology Center at the time of completion in order for a file to be established. Changes in contact information or medical status should be communicated to us in order to keep donor files up to date.

9. Donor paperwork needs (2) witnesses to verify your signature, but does not need to be notarized.
10. We do not perform autopsies or determine the cause of death for donors to our program.

11. We do not accept the donation of individuals who have been embalmed.

12. Once your donation paperwork has been received and processed, you will receive an acceptance letter and a Donor Card confirming your status as a pre-registered donor with the FAC Body Donation Program. You may keep these documents in your wallet or with your important papers to help make your wishes known. Please remember that final acceptance to our program is not confirmed until after your death.

If you have any questions or concerns that have not been addressed in these policies, please feel free to contact us at (865) 974-4408 or donateinfo@utk.edu. Our regular business hours are Monday through Friday 9 a.m. to 5 p.m. Eastern Time.

For the most up-to-date information and policies, including postmortem testing requirements, please visit our website at fac.utk.edu/body-donation/.

Body Donation Document

I, __________________________ , do hereby provide rights of disposition and give
my body, after my death, to The University of Tennessee, Knoxville. I consent for use of my body by
the Department of Anthropology or its designee, for education in forensic and biological anthropology
classes, training for professionals from around the world, and a wide variety of research that is shared
with scientific, local, and international communities. At the time of my death, I hereby relinquish all
rights and claims regarding my body and direct that by accepting and using my body for teaching and
scientific purposes, the University of Tennessee shall not incur any liability and no manner of claim
shall arise against the Forensic Anthropology Center, the Anthropology Department, the University of
Tennessee, or any of their employees or students. I request, authorize, and instruct my surviving spouse,
next-of-kin, executor, or the physician who certifies my death to notify The University of Tennessee,
Department of Anthropology (telephone: (865) 806-5106), immediately after my death of the
availability of my body.

Signed on this __________ day of ________________, at __________.

Retain for Donor’s Files

Version 8.22
The Forensic Anthropology Center (FAC) engages in a wide variety of research that benefits forensic science. Some of this research investigates the biomechanics of trauma inflicted upon the body. This allows us to better interpret skeletal conditions that are presented to us in forensic cases. In addition, this research helps increase our knowledge of the mechanisms of trauma so better equipment can be designed to protect first responders and military personnel. Please note that all trauma studies must be approved by the Director of the FAC and be reviewed by an Institutional Review Board.

Selecting yes for any of the types of research below allows us to evaluate your eligibility for the appropriate trauma research we might be conducting after your death. Selecting no will not affect your acceptance into the Body Donation Program or any other studies.

Please place your initials next to any program for which you wish to consent to being considered after your death.

- [ ] **Blunt Force Trauma** - Studies that evaluate how bone responds to impacts by blunt instruments (e.g. bat, hammer), car accidents, or falls

- [ ] **Sharp Force Trauma** - Studies that evaluate marks and fractures left behind by sharp instruments, such as knives or saws.

- [ ] **Projectile Trauma** - Studies that examine how bone responds to high velocity trauma, such as gunshots.

- [ ] **Thermal Trauma** - Studies that examine the damage that occurs during exposure to high temperatures, such as fire or cremation.

- [ ] **No**, I do not want to participate in any type of trauma-related research.

DNA Research Program

The Forensic Anthropology Center (FAC) takes careful measures to protect the privacy of our donors and their families. Human genome sequencing (DNA) research is very important in forensic science to improve the identification process of unknown individuals, but also has the potential to identify you and your family members. The FAC may be asked to conduct human DNA research. Please note that all DNA studies must be approved by the Director of the FAC and must be reviewed by an Institutional Review Board.

Selecting yes below allows us to evaluate your eligibility for this research after your death. Selecting no will not affect your acceptance into the Body Donation Program or any other studies.

Please place your initials next to your desire for this type of research.

_______ Yes, I consent to being considered for human DNA research after my death.

_______ No, I do not consent to being considered for human DNA research after my death.

University of Tennessee
Dementia Research Program

Because the rates of individuals with dementia, Alzheimer’s disease, Parkinson’s disease, multiple sclerosis, and other neurodegenerative diseases are increasing in the U.S., the Forensic Anthropology Center (FAC) may be asked to collaborate on epidemiological and neurological studies of our donors that furthers clinical research in these areas. In particular, such research may include the study of brain tissue of those with and without dementia-related illnesses. These studies may require removing the top portion of the skull after death in order to access the brain. Please note that all dementia-related studies must be approved by the Director of the FAC and must be reviewed by an Institutional Review Board.

Selecting yes below allows us to evaluate your eligibility for this research after your death. Selecting no will not affect your acceptance into the Body Donation Program or any other studies.

Please place your initials next to your desire for this program.

________ Yes, I consent to being considered for dementia-related research after my death.

________ No, I do not consent to being considered for dementia-related research after my death.

University of Tennessee
Living Subjects Research Program

The Forensic Anthropology Center (FAC) relies on people like you for a variety of learning and research opportunities, and we are very appreciative. As you know our research focus has always been on human remains following death. However, we also conduct research that could involve you as a living subject prior to your death.

Examples of living subjects research conducted at the FAC might include such things as a survey of why you are interested in donating your body at death, taking body measurements, or scanning your face, eyes, and fingerprints.

Please note that all living subjects studies must receive approval from an Institutional Review Board for use of living human subjects and must be approved by the Director of the FAC.

If you select yes, you will be contacted separately for each living subject research opportunity for which you are eligible to participate. Selecting no will not affect your acceptance into the Body Donation Program or any other studies.

Please place your initials next to your desire for this program.

_______ Yes, I consent to being considered for living subjects research.

_______ No, I do not consent to being considered for living subjects research.

_____________________________  _________________________

The use of images, videos, scans, radiographs, casts, 3D prints, and/or other representations of human remains that currently exist or are developed in the future are highly valuable for education and research purposes. These representations are important in perfecting identification techniques such as facial reconstruction and understanding body mechanics and disease progression. However, these images have the potential to include identifiable information about the person (e.g. the face, tattoos, birthmarks, etc.). These images may be used in educational and research presentations and in publications. Please note that all research projects, presentations, and publications involving imagery must be approved by the Director of the FAC and must be reviewed by an Institutional Review Board.

Selecting yes below will allow us to evaluate you for inclusion in research projects, educational presentations, and publications that include potentially identifiable images and representations of human remains. Selecting no will not affect your acceptance into the Body Donation Program or any other studies.

Please place your initials next to your desire for this program.

________ Yes, I consent to being considered for research, presentations, and publications using potentially identifiable imagery after my death.

________ No, I do not consent to being considered for research, presentations, and publications using potentially identifiable imagery after my death.
